

PHARMACY CREATIONS

Now Accredited

PCAB

Accreditation

- Pharmacy Compounding Accreditation Board sets standards for compounding pharmacies
- We are one of only 2 pharmacies in NJ to be accredited.
- One of only 100 pharmacies nationwide
- Standards include passing an extensive on-site inspection, using only the highest quality chemicals and providing ongoing staff training and education

Pharmacy Creations is Now PCAB Accredited

On December 13, 2010 Pharmacy Creations received accreditation from PCAB the Pharmacy Compounding Accreditation Board. The PCAB Seal of Accreditation is a new system of standards created by the PCAB board composed of the leading experts in the compounding pharmacy field today. Our new accreditation status as a PCAB Accredited™ compounding pharmacy lets you know that **Pharmacy Creations** ranks among the best in the nation for quality and safety, and shows our dedication to protecting our patients by practicing safe, high-quality compounding.

While as you know, compounding pharmacy is regulated by the state, PCAB Accreditation is an even more comprehensive way to ensure a compounding pharmacy has undergone the compounding pharmacy profession's most rigorous review and inspection measures.

To earn the designation "PCAB Accredited compounding pharmacy," we completed an extensive application that was reviewed by the Pharmacy Compounding Accreditation Board. Our compounding policies and procedures were then reviewed by professionals. Next, we opened our doors for an extensive on-site inspection led by compounding experts. Only when these stringent evaluations were completed did the PCAB officially grant us the PCAB Seal of Accreditation.

We are honored to be among the first in the nation to earn this new accreditation, as it sets us apart from other compounding pharmacies. It confirms our commitment to providing safe, personalized solutions that meet the medical needs of our patients.

Ophthalmology Compounds

- Many medicines needed for ophthalmology are available only from compounding pharmacies
- Fortified antibiotics like Vancomycin and Tobramycin, pre-op and post-ops
- Pharmacy Creations, certified in sterile compounding, with over 10 years of service
- Frequently patients can only use PF, preservative free solutions

Focus on Ophthalmology

The ophthalmology practice is unique in its need for a variety of ophthalmic preparations. Frequently these preparations can only be obtained from a qualified compounding pharmacist. Pharmacy Creations has been serving the needs of Ophthalmologist and their patients for more than ten years. Now accredited by PCAB, the Pharmacy Compounding Accreditation Board for both non-sterile and sterile compounding,

Pharmacy Creations has proven that it meets the most stringent standards for compounding this class of sterile products.

Our ophthalmologists call on us to provide fortified antibiotics, like Vancomycin and Tobramycin, preservative free ophthalmics for patients with sensitivities, and specialized pre-op and post-op solutions, like dilute Tetracaine and Mitomycin. For a complete list of available formulas, call the

pharmacy at (973) 328-8756 and ask to speak with one of our pharmacists.

Ophthalmics must be prepared in a sterile environment by a highly trained pharmacist. Our pharmacists are certified for sterile compounding and our preparations are tested for potency and sterility, and we only use the highest quality pharmaceutical grade ingredients to prepare our formulas.
